# What makes Nutraflex so unique

## Scientifically proven formula

Nutraflex has been formulated using the latest independent trial data of natural ingredients. Boswellia alone has over 400 independent trials supporting its use.

## Fast acting

The benefits of Nutraflex are noticeable, on average within ONE week due to the unique combination of Curcumin Complex and Boswellia Extract which supports the natural systems that control inflammation and has over 400 independent trials supporting its use.

## Veterinary strength

Nutraflex contains the highest quality and purest natural ingredients that help aid and soothe joint stiffness fast.

## Ethically sourced ingredients

All raw materials are both ethical and sustainable.

## Best value for money

On the face of it many joint supplements can appear good value however, many are very low in strength. Nutraflex provides the highest strength formula for pets whilst delivering the most affordable price per dosage.

## Turmeric (Curcumin Complex)

The active ingredient within Turmeric, our unique Curcumin complex, is a highly bioavailable antioxidant, helping reduce free radicals whilst working synergistically with Boswellia to support the natural systems that control inflammation.

## Boswellia Extract

(Boswellic Acids) - is a plant extract that supports the natural systems that control inflammation. It plays an important role in maintaining smooth and comfortable joint movement. It also does not cause the damage to cartilage that many anti-inflammatories do.

## Glucosamine HCL

An important building block for cartilage. It helps cartilage to act as a shock absorber. There are two forms of Glucosamine; HCL and Sulphate. Glucosamine HCL is the highest quality, purest form of Glucosamine, it is more stable and occurs naturally in every living organism. Glucosamine HCL has more pure Glucosamine per gram for improved cartilage formation.

## Chondroitin Sulphate

Helps maintain synovial fluid viscosity to aid joint support and is also an important building block for cartilage. Chondroitin Sulphate E from squid cartilage is the most ethically sourced form of Chondroitin with independent trial data to support its use.

## Ingredients

		Per caps
Glucosamine Hydrochloride	(99% pure)	505mg
Chondroitin Sulphate	(90% pure)	300mg
Boswellia Extract (Boswellic Acids)		75mg

L/B dog	50+	4	2

\*This amount can be given as one capsule every alternate day, if preferred.

\*\*This amount can be given as one capsule one day, followed by two capsules the next day, and so on, if preferred.

*I am an RVN, I have a GSD 8 years of age. I used Nutraflex and only 2 weeks in he is loving his walks again, I am amazed and couldn't recommend this product more, he eats it fine and is fussy with things added to his diet usually!!! Thank you Nutravet.*

Jemma Bickle. RVN

*Having had little success with other glucosamine products in the past, I was keen to try this unique product on a variety of patients. Since the introduction to Nutraflex we have prescribed it to a number of patients, for hips, elbows and stifles and had 60% of patients showing an improvement. I have not seen any adverse reactions and clients seem to find it easy to administer to their pets, including cat owners. I'm very happy to use and recommend Nutraflex.*
