# What makes Nutrahoof so unique

## Guaranteed label claim

Nutrahoof is manufactured in the UK to pharmaceutical grade standards and tested for the purity of ingredients at the raw material stage and the final completed product stage to guarantee the stated label claim, purity and product quality.

## Highest quality ingredients

Nutrahoof only contains the highest quality natural ingredients. All raw materials are both ethical and sustainable. Nutrahoof does not contain any animal derived ingredients.

## High strength formula

Nutrahoof provides a novel and natural alternative for equine hoof care by providing a unique high strength formula to support horses hooves.

## Best value for money

On the face of it many supplements can appear good value however, many are very low in strength. Nutrahoof provides a high strength product for your horse whilst delivering the most affordable price.

## Biotin

Biotin is a Vitamin B coenzyme involved in two major keratinisation processes within the epidermal cells of the hoof. Keratinisation is vital for hoof elasticity and high tensile strength. Biotin supplemented at supra-optimal levels produces a +15% higher midline growth, which results in the faster growing out of lesions. If a horse requires Biotin it is recommended they stay on it for life to maintain improved hoof condition.

## Vitamin E

Vitamin E is a vitamin which helps slow cellular aging. Vitamin E is a potent antioxidant that aids the hoof's own natural anti-inflammatory processes.

## Zinc

Zinc helps to prevent the destruction of keratin and is involved in the health and integrity of the hoof. Studies on groups of horses with poor hoof horn quality have shown lower Zinc blood and hoof levels than those horses with normal feet. This may be due to individual Zinc absorption, metabolism, or retention abnormalities.

## Echinacea purpurea

A traditional herb also known as the Purple Cone Flower has been used for centuries to aid immunity. Echinacea also has significant antioxidant properties which aid a horses natural anti-inflammatory processes.

## Methionine

Methionine is an important amino acid and a source of sulphur that is an important building block of healthy connective tissues, such as collagen and keratin.

## Ingredients per 10g scoop

Biotin (99% Pure)	75mg
Zinc as Picolinate (99% Pure)	100mg
Zinc as Sulphate (99% Pure)	250mg
DL Methionine (99% Pure)	2500mg

Body weight (kgs)	Daily administration
Under 500Kg	1 scoop a day
Over 500Kg	1.5 scoops per day

(1 rounded scoop = 10g)

To be given to your horse as recommended by your veterinary surgeon.

Powder to be sprinkled onto or into your horses usual food.

*I've been using Nutrahoof on my old pony for 2.5 weeks and has noticed a huge difference in that short amount of time. Even the farrier has commented on the results I'm really happy!*

Alice at Dulverton Vets

*We have experienced effective results with their range with no side effects. Each product is competitively priced in order for us to pass these savings onto clients. I like their simple recycled packaging and easy admin regimes along with excellent supportive materials for clients means compliance is high. All products are supported by a friendly supportive team who are happy to assist with any technical issue. I am happy to endorse Nutravet and excited to be part of their success.*
