

*I'm so pleased with Nutramind for my dog. All the pacing he did in the evening has stopped. He was continually wanting to go outside just to stare at the gate or the car and that has stopped too! I am delighted - thank you!*

Anita Thornley

*If anyone has a senior dog I can't recommend Nutramind highly enough. It has made a world of difference to our beautiful boy and given him a new lease of life. Our Jack Russell is 15. After we moved house last year, he started weeing indoors, often in his own bed without realising. He was also waking in the night to go to the toilet which was unusual for him, and he was seeming disoriented sometimes. Since he's been on Nutramind, he has been massively more alert and all the toilet issues have stopped. It feels like we've got our young dog back. He was very active and alert for his age anyway but these capsules just seem to have given him a new lease of life. No disoriented behaviour, no toilet issues, and he just seems more with it. He seems more present and like he knows exactly what's going on. As I say he was always good for his age, but this just seems to have revitalised him in a way we didn't expect.*

## Trusted & recommended by vets to aid your pet's mental health & training.

### Administration

Type	Body weight (kgs)	Caps per day
Cat	0-9.99	1*
S/B dog	0-9.99	1
M/B dog	10-24.99	2
L/B dog	25-49.99	3
L/B dog	50+	4

### Each capsule contains:

Total Omega-3s (From Purified Fish Oils)	210mg
DHA (Docosahexaenoic Acid)	165mg
EPA (Eicosapentaenoic Acid)	32mg
Ginkgo Biloba Extract (99% pure)	20mg
Vitamin B3	15mg
Vitamin B6	15mg
d-Alpha Tocopherol (Natural Vitamin E)	10mg
Vitamin B1	10mg
Vitamin B8	10mg
Phosphatidylserine	3mg
Vitamin B12	15mcg

Each capsule is free from mammalian gelatin and is made from fish gelatin. Nutramind contains sustainable marine sourced ingredients.

## High strength support for brain & mental function

For dogs & cats

We all hope that our pets will have a long and healthy life. Unfortunately like humans, some pets require additional support for their cognitive health.

Early and ongoing supplementation can also be beneficial for training whilst helping with the long-term brain health of your pet as they age.

Nutramind includes the key nutrients for supporting cognitive function in older pets, whilst benefitting younger pets in training and learning.

### High strength, high quality

Nutramind contains only the highest quality natural ingredients to provide a natural aid for supporting brain health and cognitive function.

### Aids learning abilities

Omega-3s have been shown to aid learning abilities in young puppies. Other studies linked low blood Omega-3 with dog aggression, indicating beneficial applications of Omega-3s throughout the entire life of your pet to maintain brain health.

### Supports cognitive function

Research demonstrates that Omega-3 supplementation from fish oil supports cognitive function. Oral Omega-3, especially from DHA has been shown to aid the structure and function of brain cells by aiding the natural synthesis of synaptic membranes and dendritic spines, thereby aiding neurotransmission.

### Ethically sourced & 100% natural

Nutramind is driven by our dedication to animal welfare and the sustainability of the environment. All raw materials are both ethically and sustainably sourced. We only use natural ingredients, packaged in environmentally friendly recycled materials.

Nutramind has been developed by vets to provide high strength nutritional support for healthy brain function in dogs and cats. It includes the key nutrients for supporting cognitive function in ageing pets, whilst also benefitting younger pets in training and learning.

#### Nutramind includes:

**Refined fish oils** - Nutramind contains highly refined Omega-3 fish oil from ocean sardines. The fish oil is put through an exclusive 6-step manufacturing process to extract the beneficial Omega-3s DHA and EPA whilst removing other undesirable pollutants for maximum purity.

**Phosphatidylserine** - An amino acid derivative compound that is fat-soluble and found in high amounts in the brain, where it contributes to cognitive functioning. **Ginkgo Biloba Extract** - The leaf extract of Ginkgo is an antioxidant and aids the body's own natural anti-inflammatory processes. It has been used for over 5000 years to support memory ability and hypoxia tolerance in brain cells.

**Natural Vitamin E** - Helps support cellular aging. It is another potent antioxidant that helps aid free radicals within the brain.

**B Vitamins** - Some essential B Vitamins are implicated in the synthesis of brain neurotransmitters specifically Dopamine and Noradrenaline. A two year study showed that a mixture of B Vitamins helped maintain brain health particularly in areas.

#### Nutramind benefits:

- ✓ Aids healthy brain function
- ✓ Supports cognitive function
- ✓ Aids training and learning
- ✓ Easy administration
- ✓ High strength Omega-3's rich in DHA
