What makes Nutraplaque so unique

Double action formula

The unique double action formula of Nutraplaque combines to support optimal oral health by reducing plaque build up, and bad breath.

Reduces plaque build up

The specially selected patented Norwegian seaweed within Nutraplaque has been shown to reduce plaque build-up by 35% after just 4 weeks use.

Helps to prevent & soften tartar

The seaweed bio-actives are absorbed systemically and are secreted into the saliva to reduce the accumulation of plaque (which hardens to become tartar). Cleaner, whiter teeth improve oral health and produce fresher breath. Nutraplaque should be fed continuously to maintain this effect.

Helps with bad breath

Studies have shown that the unique ingredients used within Nutraplaque can help reduce bad breath by up to 63% after 12 weeks.

Free from artificial colours, preservatives, gluten & sugar

Nutraplaque is completely free from unnecessary and harmful sugars and preservatives that can cause tooth decay and damage teeth and gums.

Easy to administer sprinkle capsules

For ease of administration, Nutraplaque is presented in capsules which can be given whole or opened and sprinkled on food which provides more flexibility for pets and owners.

Ascophyllum nodosum Seaweed

Ascophyllum Nodosum is a special source of brown seaweed selected for its ability to reduce plaque, tartar and bad breath. It contains bio-actives such as Fucoidans and Polyphenols which are systemically absorbed into the body tissues and are clinically proven to reduce oral plaque and improve gum and teeth health.

Green Tea Extract (Decaffeinated)

Green Tea contains antioxidant Polyphenols called Catechins, which have the ability to bind to tooth enamel and reduce plaque adhesion. A reduction in oral bacteria numbers reduces tartar accumulation and helps produce fresher breath.

Ingredients per sprinkle capsule

Ascophyllum nodosum Seaweed (99% pure)	300mg
Decaffeinated Green Tea Extract (98% pure)	15mg
Yeast Extract	35mg

Administration

Type	Body weight (kgs)	Caps per day
Cats & S/B dog	0-9.99	1
M/B dog	10-24.99	2
L/B dog	25-49.99	3
L/B dog	50+	4

I use Nutraplaque for both of my old cats to keep their teeth healthy (and stop their bad breath!!). After a few weeks, I certainly noticed the difference, specifically in their breath. The capsules just get sprinkled into their food or sometimes I hide in some tuna as they can be fussy and they eat it no problems.

Peter Jackson

A very good company who deliver quality products at affordable prices. Customer service is always very helpful and friendly. We have only had good experiences when ordering from Nutravet"
