What makes Nutraquin so unique

Everyday support

The high strength formula of Nutraquin has been developed to help aid joint health by supporting mobility. For severe cases or where pets are showing signs of joint stiffness we recommend you use Nutraquin+ or Nutraflex.

Refined fish oils

Nutraquin contains highly refined Omega-3 fish oil from ocean sardines. The fish oil is put through an exclusive 6-step manufacturing process to extract the beneficial Omega-3s EPA and DHA from the oil and refining them to the highest quality standards. Refining the oil also removes heavy metals and other undesirable pollutants to ensure maximum purity.

High strength formula

Unique high strength formula that helps maintain optimum joint health.

Highest quality ingredients

Contains only high quality ingredients, no fillers or bulking agents are used.

Ethically sourced ingredients

All raw materials are both ethical and sustainable.

Best value for money

On the face of it many joint supplements can appear good value however, many are very low in strength. The Nutraquin range provides the highest strength products for pets whilst delivering the most affordable price per day.

Omega-3s

Nutraquin contains a formula of high purity, refined Omega-3s from fish oils which provide a concentrated source of EPA and DHA. Omega-3's have been scientifically proven to aid joint mobility by supporting the natural systems that control inflammation and helping aid blood flow to the joints.

Glucosamine HCL

An important building block for cartilage. It helps cartilage to act as a shock absorber. There are two forms of Glucosamine; HCL and Sulphate. Glucosamine HCL is the highest quality, purest form of Glucosamine, it is more stable and occurs naturally in every living organism. Glucosamine HCL has more pure Glucosamine per gram for aiding cartilage formation.

Boswellia Extract

(Boswellic Acids) - is a plant extract that supports the body's natural anti-inflammatory processes. It plays an important role in maintaining smooth and comfortable joint movement. It also does not cause damage to cartilage.

Ingredients per capsule

Each capsule contains:

Total Omega-3's (purified fish oils)	200mg
EPA (Eicosapentaenoic Acid)	139mg
DHA (Docosahexaenoic Acid)	55mg
Glucosamine HCl (99% Pure)	250mg
Boswellia Extract (Boswellic Acids)	37.5mg

Administration

Type	Body weight (kgs)	Loading (6 weeks) (Caps per day)	Maintenance (Caps per day)
S/B dog	0-9.99	1	0.5*
M/B dog	10-24.99	2	1
L/B dog	25-49.99	3	1.5**
L/B dog	50+	4	2

For severe cases: we recommend you use Nutraquin+

* This amount can be given as one capsule every alternate day, if preferred.

**This amount can be given as one capsule one day, followed by two capsules the next day, and so on, if preferred.

A life changing product. We noticed after a couple of weeks our 11 year old Labrador had a lot more spring in her step and was keen to play, whatever the weather. She's still going strong one year later.

Jill Wareham

ALL our patients who regularly take Nutraquin noticeably benefit from the product, and clients have all been impressed with the results seen in their pets. We would thoroughly recommend both the company, Nutravet and their products.
