

Before Nutraren my 15 year old girl was drinking water non stop day and night and always jumping up for a wee. Now she is stable and settled, not had her bloods done for a while but Nutraren has certainly improved her quality of life for certain, thank you.

nutraren

High strength support to aid healthy renal function

For cats & dogs

Maintaining good renal health is vital for an animal's general health and wellbeing especially as they get older.

The kidneys main role is to cleanse the blood of toxins and transform the waste into urine, controlling osmolality and regulating blood pressure. The kidneys also keep both phosphate and calcium at healthy levels.

Nutraren helps aid kidney health in an easy to administer high strength gel capsule.

Multi-action formula

Kidneys play an important role including filtering waste products, controlling osmolality and regulating blood pressure. The kidneys also keep both phosphate and calcium at healthy levels. Nutraren contains a unique combination of Omega-3s, toxin binders and antioxidants that naturally help to support long-term renal function.

Natural antioxidant properties

The natural ingredients within Nutraren include Vitamin E and Chitosan antioxidants which help to keep free radicals in check and maintain renal architecture and function.

Aids blood flow to the kidneys

Nutraren contributes to the maintenance of blood pressure and optimises blood triglyceride levels to support long-term kidney health function.

Binds toxins

Nutraren helps bind toxins in the gut, which prevents them from being absorbed into the bloodstream. This helps to aid healthy blood flow into the kidneys where a stable balance of body chemicals can be achieved and waste products and excess fluid from the body are removed.

Nutraren has been formulated using scientifically proven ingredients that aid kidney health, renal function, bind toxins and support an animal's quality of life, in an easy to administer high strength gel capsule.

Nutraren includes:

Omega-3s - High purity Omega-3s (EPA and DHA) from fish oil can have beneficial effects on supporting the animal's natural systems that control inflammation and support a better quality of life.

Calcium - Derived from the red seaweed Lithothamnium calcareum with its porous honeycomb structure has exceptional Calcium bioavailability and helps support renal function.

Chitosan - Chitosan from Icelandic shrimp shells, binds toxins in the digestive tract which helps to aid and maintain kidney loading.

Vitamin E - Natural Vitamin E (d-Alpha Tocopherol) acts as an antioxidant and helps to support natural blood pressure.

Nutraren benefits:

- ✓ Supports healthy renal function
- ✓ Helps support long-term kidney health
- ✓ Aids healthy kidney function
- ✓ Helps bind toxins in the gut
- ✓ Natural antioxidant properties
- ✓ Helps maintain kidney architecture
- ✓ Palatable and easy to administer
- ✓ High purity Omega-3s from fish oils
