

*We were recommended Nutraplaque by our vets to make sure plaque doesn't build up on our fantastic Frank's teeth. We just sprinkle it into his meal and he doesn't even know he's having it - perfect!*

**Advanced support for reducing plaque, tartar & bad breath**

- ✓ Helps remove & control plaque
- ✓ Support healthy teeth & gums
- ✓ Reduces bad breath
- ✓ For dogs & cats

*I use Nutraplaque for both of my old cats to keep their teeth healthy (and stop their bad breath!!). After a few weeks, I certainly noticed the difference, specifically in their breath. The capsules just get sprinkled into their food or sometimes I hide in some tuna as they can be fussy and they eat it no problems.*

# nutraplaque

## Helps reduce & control plaque

For dogs & cats

Plaque and tartar are very common in pets and among the most frequent concerns seen by vets. Maintaining dental care is necessary to provide optimum health and quality of life.

Nutraplaque is a 100% natural product that provides an advanced double action formula to help aid oral health and hygiene by systemically working against bad breath, tartar & plaque for healthy teeth and gums.

Nutraplaque is proven to aid oral health and hygiene by systemically working against bad breath, tartar & plaque around the clock.

### Clinically formulated

Nutraplaque includes clinically proven ingredients that aid oral health and hygiene by systemically working against bad breath and tartar. The unique double action formula combines to support optimal oral health by reducing plaque build up, and bad breath.

### Helps to prevent & soften tartar

The seaweed bio-actives are absorbed systemically and are secreted into the saliva to reduce the accumulation of plaque (which hardens to become tartar). Cleaner whiter teeth improve oral health and produce fresher breath. Nutraplaque should be fed continuously to maintain this effect.

### Reduces plaque build up by 35%

The specially selected patented Norwegian seaweed within Nutraplaque has been shown to reduce plaque build-up by 35% after just 4 weeks use.

### Naturally helps oral hygiene 24 hours per day

The natural ingredients within Nutraplaque improve oral health around the clock, where they work within the saliva to reduce new plaque from forming whilst softening existing tartar.

You can start using Nutraplaque at any age as part of your pet's daily oral health routine to reduce plaque and tartar build up.

#### Nutraplaque includes:

**Ascophyllum Nodosum** - Ascophyllum nodosum is a special source of brown seaweed selected for its ability to reduce plaque, tartar and bad breath. It contains bio-actives such as Fucoidans and Polyphenols which are systemically absorbed into the body tissues and are clinically proven to reduce oral plaque and improve gum and teeth health.

**Green Tea Extract (Decaffeinated)** - Green Tea contains antioxidant Polyphenols called Catechins, which have the ability to bind to tooth enamel and reduce plaque adhesion. A reduction in oral bacteria numbers reduces tartar accumulation and helps produce fresher breath.

Before

After

#### How long will it take to see results?

Nutraplaque's unique formulation works naturally within an animal's body. The natural ingredients work through the saliva, where they help reduce new plaque from forming and soften existing tartar around the clock.

The benefits are usually seen within 3-8 weeks of continued use but will be dependent on the pet's unique situation. The effects can be seen for as long as the product is being taken, with the results providing visibly whiter, cleaner teeth and fresher breath.

#### Nutraplaque benefits:

- ✓ Scientifically proven to reduce plaque & remove tartar
- ✓ Helps control plaque
- ✓ Reduces bad breath
- ✓ Supports healthy teeth & gums
- ✓ Easy to administer sprinkle capsules
