What makes Nutracoat so unique

High strength, high quality

Nutracoat contains only the highest quality natural ingredients and provides a natural alternative for supporting skin and coat maintenance.

No added Omega-6 fatty acids

Studies have shown adding Omega-6s has a negative effect on reducing inflammation and so for this reason Nutracoat contains no added Omega-6 fatty acids.

Refined fish oils

Nutracoat contains highly refined Omega-3 fish oil from ocean sardines. The fish oil is put through an exclusive 6-step manufacturing process to extract the beneficial Omega-3s EPA and DHA from the oil and refining them to the highest quality standards. Refining the oil also removes heavy metals and other undesirable pollutants to ensure maximum purity.

Ethically sourced ingredients

All raw materials are both ethically and sustainably sourced.

Omega-3s

Nutracoat is specifically developed for animals and contains a high strength formula totalling 275mg of Omega-3s with active fatty acids EPA (130mg) and DHA (85mg). It works in the skin to aid the body's own natural anti-inflammatory processes.

EPA and DHA

These are the precursors for newly discovered lipids called resolvins and protectins which support the natural systems that control inflammation.

d-Biotin

d-Biotin synthesises fatty acids and is important for maintaining healthy skin, coat and nails.

d-Alpha Tocopherol (Natural Vitamin E)

The most potent natural source of Vitamin E is used as an antioxidant to support the immune system.

Ingredients per gel capsule

Total Omega-3s	275mg
EPA (Eicosapentaenoic Acid)	130mg
DHA (Docosahexaenoic Acid)	85mg
d-Biotin	5mg
d-Alpha Tocopherol (Natural Vitamin E)	10mg

Administration

Type	Body weight (kgs)	Caps per day
Cat	0-9.99	1*
S/B dog	0-9.99	1
M/B dog	10-24.99	2
L/B dog	25-49.99	3
L/B dog	50+	4

* This amount to be given 1 every alternate day

I've had an amazing response with Nutracoat with a chocolate Labrador called Hershey who had a dry coat with patchy loss. He went on Nutracoat 6 weeks ago and now I barely recognise him. His coat is thick, glossy, luxurious and soft and fully grown back - phenomenal change and the owner is very happy.

Georgia Owen, Castle House Vets

My Black Labrador, Cody, is doing really well thanks to Nutracoat, his coat is almost restored to its former glory and his scratching has stopped altogether. After 2 months the change is quite dramatic!

Margaret

Absolutely brilliant. My Sheltie was put on Nutracoat and has now stopped skin flaking. Her new coat is luxurious and the rich colour restored!
