

*My black Labrador, Cody, is doing really well thanks to Nutracoat, his coat is almost restored to its former glory and his scratching has stopped altogether. After 2 months the change is quite dramatic!*

Margaret Cornwall

*I've had an amazing response with Nutracoat with a chocolate Labrador called Hershey who had a dry coat with patchy loss. He went on Nutracoat 6 weeks ago and now I barely recognise him. His coat is thick, glossy, luxurious and soft and fully grown back, phenomenal change and the owner is very happy.*

Georgia Owen, Castle House Vets

## Trusted & recommended by vets for healthy skin & a glossy coat

### Administration

Type	Body weight (kgs)	Caps per day
Cat	0-9.99	1*
S/B dog	0-9.99	1

# nutracoat

## Helps reduce itchy flaky skin

For dogs & cats

Skin health can be affected by many factors including: fleas, food allergies and an acute fatty acid imbalance so it's important to support their skin and coat condition throughout their lifetime.

Skin and coat health is one of the most common reasons an owner will take their pet to visit the vet.

Nutracoat not only helps reduce itching and scratching but aids healthy skin and a glossy coat.

### High strength, high quality

Nutracoat contains only the highest quality natural ingredients and provides a natural alternative for supporting skin and coat maintenance.

### Contains refined fish oils

Nutracoat contains highly refined Omega-3 fish oil from ocean sardines. The fish oil is put through an exclusive six-step manufacturing process to extract the beneficial Omega-3s EPA and DHA from the oil. Refining the oil removes heavy metals and other undesirable pollutants to ensure maximum purity.

### No added Omega-6 fatty acids

Studies have shown adding Omega-6s has a negative effect on reducing inflammation and so for this reason Nutracoat contains no added Omega-6 fatty acids.

### Ethically sourced & 100% natural

Nutracoat is driven by our dedication to animal welfare and the sustainability of the environment. All raw materials are both ethically and sustainably sourced. We only use natural ingredients packaged in environmentally friendly recycled materials.

Nutracoat has been developed by vets using a unique formula of key natural ingredients to aid healthy skin and a glossy coat, whilst soothing dry, flaky skin and reducing itching and scratching.

#### Nutracoat includes:

**Omega-3s** - Omega-3s work in the skin to aid the body's own natural anti-inflammatory processes.

**EPA and DHA** - These are the precursors for newly discovered lipids called resolvins and protectins, which support the natural systems that control inflammation. Nutracoat contains a high strength formula totalling 275mg of Omega-3s with active fatty acids EPA (130mg) and DHA (85mg).

**d-Biotin** - d-Biotin synthesises fatty acids and is important for maintaining healthy skin, coat and nails.

**d-Alpha Tocopherol (Natural Vitamin E)** - The most potent natural source of Vitamin E is used as an antioxidant to support the immune system.

#### The Omega-6 imbalance

Often pets unwittingly receive an unnatural diet, which is too high in Omega-6 fatty acids derived from high levels of cereals and vegetable proteins. Feeding additional Omega-6 fatty acids can worsen the condition of your pet's skin. It is for this reason that Nutracoat contains high strength Omega-3 fatty acids which are particularly important to counteract the Omega-6 imbalance and does not include any added Omega-6 fatty acids.

#### Nutracoat benefits:

- ✓ Calms sensitive skin
- ✓ Soothes dry, flaky skin
- ✓ Reduces itching & scratching
- ✓ Aids comfort
- ✓ Strengthens brittle nails
- ✓ Aids the body's own natural anti-inflammatory processes
- ✓ Contains sustainable marine sourced ingredients
