Fast acting support for stress & anxiety

Maintain your routine

Try to keep all other routines as normal as possible such as feeding times

Nutracalm is a fast acting natural supplement with calming properties. It has been designed to aid a quick natural response once taken, with results often evident within 1 hour of taking the capsule.

Fast acting (1-2 hours)

Ethically sourced & 100% natural

We are dedicated to animal health, welfare and the sustainability of the environment. All raw materials are both ethical and sustainable. We only use natural ingredients packaged in environmentally friendly recycled materials.

Try & mask the sound

By putting the TV on or playing some music, especially if animals are left home alone.

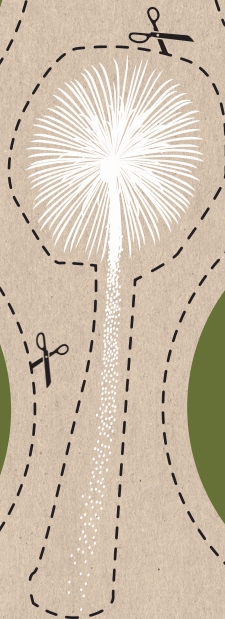

Avoid walking dogs at night

When fireworks are being set off, try morning or noon walks.

Common signs that
your pet is stressed
during the fireworks

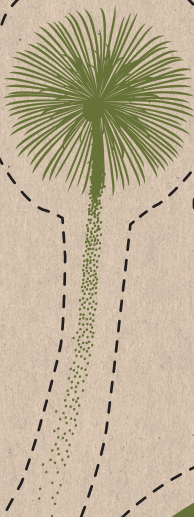

Feed

A high carbohydrate dinner.

Muffle the sound

By closing the curtains and windows.

Burn extra energy

By taking your pets on longer walks during the day.

Provide a den

Create an enclosed 'safe place' for your pet to hide. Cover the top and 3 sides of a crate, table or cupboard near the centre of the home or where they have previously hidden. Make it comfortable. You can even add a jumper or t-shirt of yours that will smell familiar to them.

Let them come and go as they like.

Keep cats indoors

Place plenty of litter trays around the home especially, by usual exit points.

Nutracalm is recommended by thousands of vets across the UK and Ireland for pets suffering with stress and anxiety. Travel, kennel or cattery stays, separation anxiety and other stressful situations such as fireworks.

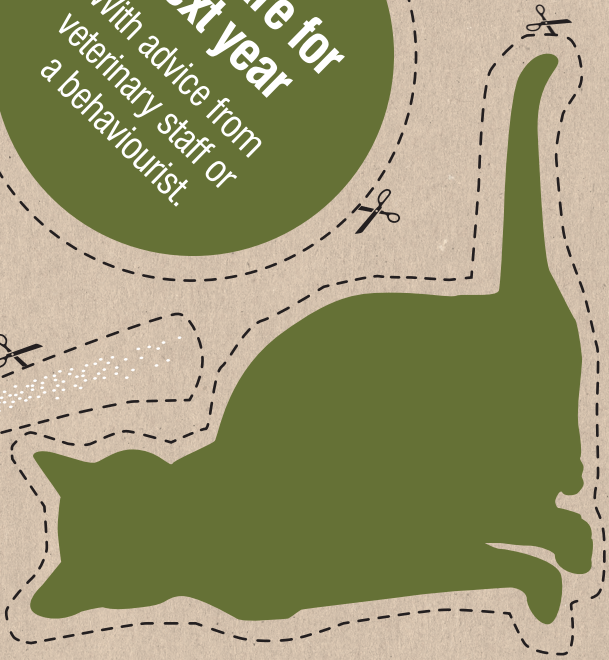

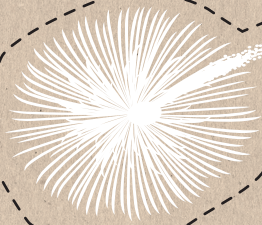

Recommended by vets

nutracalm

Excessive licking
or grooming

Pacing &
panting

veterinary staff or
a behaviourist.

nutracalm

Tips for keeping your
pet calm during the
fireworks season

Covering &
hiding behind
furniture

Highest quality ingredients

Nutracalm only contains the highest quality natural ingredients. Nutracalm does not contain any animal derived ingredients.

Decreased
appetite

Urinating &
soiling in the
house

Clinging
to owners

Aggression

Destruction of
property

Excessive
vocalisation

Stay calm yourself

During the fireworks, don't react to any fireworks that go off—they will react to your reactions. Try not to worry and don't get angry with your pet or over fuss them, just reassure them gently and be as normal and routine as possible.

Shaking /
trembling

"Nutracalm is the best calming product for my two small dogs. Lexi is a very nervous dog, while Pheobe seems not as nervous, I've used the Nutracalm on Lexi for bonfire night as the loud bangs upset her to the point where she messes herself. I now use Nutracalm on occasions where I feel she would benefit them most, such as, vet visits, New Year and bonfire night. I would not be without Nutracalm and I now have very calm dogs."

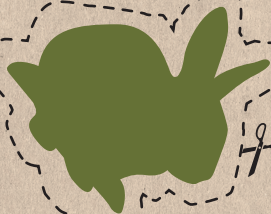

Alison Collins

Nutracalm benefits

"We got Nutracalm as our dog is terrified of fireworks. We had tried other products with not much success, but then came across the advert for Nutracalm. I was able to get some from our vet and the difference in her was great, no panting, no shaking. I would recommend them to anyone with a nervous dog – worth every penny."

Sue Marjoram

"I tried other calming products over the firework season with no hope of keeping Annie less anxious. My vet suggested Nutracalm and WOW what a huge difference. Annie was chilled out but still aware of what was going on and settled so much quicker. Will never be without these in our house. Annie is a rescue Cockapoo/Labradoodle who lives on her nerves and is terrified of anyone and everything. Within half an hour of taking Nutracalm she is chilled out and much more able to cope with the stresses that life throws at us, 100% recommend."

Laura Moore
