Pet Ready Soothing balm

Safe, effective, non-toxic

Using high quality natural ingredients, Pet Ready Soothing Balm combines four nourishing oils and butters which are safe if licked or ingested ensuring peace of mind for pet owners.

Aids comfort

Regular use can help protect against cracked paw pads, callused elbows, and dry or cracked noses, preventing the skin from splitting, bleeding and chapping.

Nourishes & hydrates

The special emollients within Pet Ready Soothing Balm provide a protective barrier to help lock in moisture and promote soft, healthy nose and paws, reducing dryness and flaking whilst restoring suppleness.

Non irritating formula

The hypoallergenic formula has been developed to calm and soothe pets with sensitive skin. It doesn't contain any harsh ingredients and is paraben free.

Easy to apply

It just takes seconds to massage the soothing balm into the skin to give a dog's paws and nose protection from the elements and the environment.

Castor oil

Deeply moisturising with anti-inflammatory properties this oil creates a protective barrier on the skin, helping to retain moisture and promote healing.

Shea butter

Rich, creamy butter is known to enhance collagen production supporting skin elasticity and repair. It also contains moisturising fatty acids and antioxidants that support the body's natural systems in managing inflammation.

Coconut oil

Lightweight and highly moisturising with antimicrobial properties, coconut oil can also support the natural systems that control inflammation and counteract free radicals.

Beeswax

A natural alternative to petroleum jelly, which is just as effective in forming a protective barrier. Beeswax shields the skin from environmental irritants and harsh weather. Unlike petroleum-based products, it doesn't block pores, allowing the skin to breathe naturally.

Ingredients:

Castor oil, shea butter, coconut oil and beeswax.

Directions for use:

Gently rub Pet Ready Soothing Balm on the nose or paw pads. Possible to apply 2-3 times daily if needed.

We used this on my bulldogs hardened pads and it made them amazingly smooth again and she was much more comfortable.
